Elsevier Science Publishers B.V., Amsterdam

Subject index

Alkylbenzenes
Analysis of soot from the combustion of alkylbenzenes, 53
Amino acids
Quantitative analysis of the pyrolysis–mass spectra of complex mixtures using artificial neural networks: application to amino acids in glycogen, 93
Artificial neural networks
Quantitative analysis of the pyrolysis–mass spectra of complex mixtures using artificial neural networks: application to amino acids in glycogen, 93

Biotechnology
Quantitative analysis of the pyrolysis–mass spectra of complex mixtures using artificial neural networks: application to amino acids in glycogen, 93
Block
Differentiation of block, random and block–random ethylene/vinylcyclohexane copolymers by pyrolysis–gas chromatography/mass spectrometry, 185

Carbon adsorbents
Pyrolysis of lignin biomass–novolac resin for the production of polymeric carbon adsorbents, 37
Carbon fibers
Vapor grown carbon fibers from pyrolysis of hydrocarbons: modeling of filament growth and poisoning, 131
Carcinogens
The scope of laser–mass spectrometry and other mass spectrometric techniques for studying engine deposits and exhaust emissions, 1
Cellulose
Kinetics of the thermal decomposition of cellulose in sealed vessels at elevated pressures. Effects of the presence of water on the reaction mechanism, 159
Coal
Solid state pyrolyses. Part 4. Kinetic evaluation of coal pyrolyses: effects of maturation, 115
Copolymers
Differentiation of block, random and block–random ethylene/vinylcyclohexane copolymers by pyrolysis–gas chromatography/mass spectrometry, 185

Differential scanning calorimetry
Kinetics of the thermal decomposition of cellulose in sealed vessels at elevated pressures. Effects of the presence of water on the reaction mechanism, 159
Diisopropylether
Analysis of soot from the combustion of alkylbenzenes, 53
Direct analysis
Direct analysis of polypropylene compounds by thermal desorption and pyrolysis–mass spectrometry, 65
Disilane
A mass spectrometry study of the gas pyrolysis of PH_3 and a PH_3/Si_2H_6 mixture, 27

Esters
The behaviour of esters in the presence of tetramethylammonium salts at elevated temperatures; flash pyrolysis or flash chemolysis?, 175
Exhaust emissions
The scope of laser–mass spectrometry and other mass spectrometric techniques for studying engine deposits and exhaust emissions, 1

Filament growth
Vapor grown carbon fibers from pyrolysis of hydrocarbons: modeling of filament growth and poisoning, 131
Flash chemolysis
The behaviour of esters in the presence of tetramethylammonium salts at elevated temperatures; flash pyrolysis or flash chemolysis?, 175
Flash pyrolysis
The behaviour of esters in the presence of tetramethylammonium salts at elevated temperatures; flash pyrolysis or flash chemolysis?, 175

Gas chromatography
Differentiation of block, random and block–random ethylene/vinylcyclohexane copolymers by pyrolysis–gas chromatography/mass spectrometry, 185
GC/MS
Analysis of soot from the combustion of alkylbenzenes, 53

The scope of laser–mass spectrometry and other mass spectrometric techniques for studying engine deposits and exhaust emissions, 1
Glycogen
Quantitative analysis of the pyrolysis–mass spectra of complex mixtures using artificial neural networks: application to amino acids in glycogen, 93

Homogeneous decomposition
Laser powered homogeneous decomposition of vinyl acetate, 21
Hydrocarbons
Vapor grown carbon fibers from pyrolysis of hydrocarbons: modeling of filament growth and poisoning, 131

Kinetics
Kinetics of the thermal decomposition of cellulose in sealed vessels at elevated pressures. Effects of the presence of water on the reaction mechanism, 159
Solid state pyrolyses. Part 4. Kinetic evaluation of coal pyrolyses: effects of maturation, 115
Klason lignin
Pyrolysis of lignin biomass–novolac resin for the production of polymeric carbon adsorbents, 37

Laser-induced decomposition
Laser powered homogeneous decomposition of vinyl acetate, 21
Laser–mass spectrometry
The scope of laser–mass spectrometry and other mass spectrometric techniques for studying engine deposits and exhaust emissions, 1

Mass spectrometry
A mass spectrometry study of the gas pyrolysis of PH_3 and a PH_3/Si_2H_6 mixture, 27
Differentiation of block, random and block–random ethylene/vinylcyclohexane copolymers by pyrolysis–gas chromatography/mass spectrometry, 185
Studies on the thermal degradation of polyphenyl-as-triazines by high resolution pyrolysis–gas chromatography/mass spectrometry and thermogravimetry, 145
Maturation
Solid state pryolyses. Part 4. Kinetic evaluation of coal pyrolyses: effects of maturation, 115

Novolac resin
Pyrolysis of lignin biomass–novolac resin for the production of polymeric carbon adsorbents, 37

Olive stone biomass
Pyrolysis of lignin biomass–novolac resin for the production of polymeric carbon adsorbents, 37

Phosphine
A mass spectrometry study of the gas pyrolysis of PH_3 and a PH_3/Si_2H_6 mixture, 27
Poisoning
Vapor grown carbon fibers from pyrolysis of hydrocarbons: modeling of filament growth and poisoning, 131
Polyphenyl-as-triazines
Studies on the thermal degradation of polyphenyl-as-triazines by high resolution pyrolysis–gas chromatography/mass spectrometry and thermogravimetry, 145
Polypropylene compounds
Direct analysis of polypropylene compounds by thermal desorption and pyrolysis–mass spectrometry, 65
Py–Ms
Quantitative analysis of the pyrolysis–mass spectra of complex mixtures using artificial neural networks: application to amino acids in glycogen, 93
Pyrolysis–gas chromatography
Studies on the thermal degradation of polyphenyl-as-triazines by high resolution pyrolysis–gas chromatography/mass spectrometry and thermogravimetry, 145
Pyrolysis–mass spectrometry
Direct analysis of polypropylene compounds by thermal desorption and pyrolysis–mass spectrometry, 65

Silicon thim films
A mass spectrometry study of the gas pyrolysis of PH_3 and a PH_3/Si_2H_6 mixture, 27
Solid state
Solid state pyrolyses. Part 4. Kinetic evaluation of coal pyrolyses: effects of maturation, 115
Soot
Analysis of soot from the combustion of alkylbenzenes, 53

Tetramethylammonium salts
The behaviour of esters in the presence of tetramethylammonium salts at elevated temperatures; flash pyrolysis or flash chemolysis?, 175
Thermal decomposition
Kinetics of the thermal decomposition of cellulose in sealed vessels at elevated pressures. Effects of the presence of water on the reaction mechanism, 159

Thermal degradation
Studies on the thermal degradation of polyphenyl-as-triazines by high resolution pyrolysis–gas chromatography/mass spectrometry and thermogravimetry, 145
Thermal desorption
Direct analysis of polypropylene compounds by thermal desorption and pyrolysis–mass spectrometry, 65
Thermogravimetry
Studies on the thermal degradation of polyphenyl-as-triazines by high resolution pyrolysis–gas chromatography/mass spectrometry and thermogravimetry, 145

Vinyl acetate
Laser powered homogeneous decomposition of vinyl acetate, 21

Water
Kinetics of the thermal decomposition of cellulose in sealed vessels at elevated pressures. Effects of the presence of water on the reaction mechanism, 159
